## GREENTEK

Step 01 | Sustainable SBS Sealers

GreenTek sealers by hawo such as the hm 950 DC-VI NanoPak are equipped **with sustainable and resource-saving technologies.** These devices only need a fraction of the energy required by conventional systems, the carbon-footprint is correspondingly low.

hawo sealing devices are of course produced with self-generated solar power and shipped in plastic-free transport packaging, completely in line with our ConceptZero.

## ORGANIXprotect

Step 02 | Plastic-free Protective Packaging

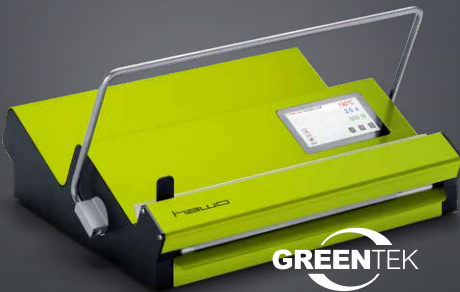

ORGANIXprotect is the first **sustainable protective packaging** for sterile barrier systems. As a so-called Dust Cover, it fulfills the requirements for protective packaging according to DIN EN ISO 11607-01 by providing a physical protection for the SBS and its contents.

ORGANIXprotect is made exclusively from sustainable raw materials and is **100% plastic-free, compostable and recyclable.**

## hm 950 DC-VI Nanopak

A state-of-the-art heating system brings NanoPak and other models to their operating temperature in a record time and operates with a highly efficient 24 volt system that reduces power consumption to a minimum.

## hd 480 WSI-V ValiPak TOUCH

The stand-by function or automatic switch-off when not in use is a standard feature of more and more hawo devices. It perfectly completes the GreenTek concept without any compromises regarding the quality of the sealing results.

### ***Rolls:***

- 200 mm x 400 m
- 250 mm x 400 m
- 300 mm x 400 m

## **ORGANIX protect R**

Standard rolls in various widths for an individual adaptation to the size of each sterile barrier system. With the help of a film sealing device, the protective packaging can be produced precisely and cost-effectively on site.

### ***Self-adhesive pouches:***

- 200 x 300 + 50 mm
- 250 x 400 + 50 mm
- 300 x 500 + 50 mm

Tolerance range +/- 2 mm.  
Other sizes on request.

## **ORGANIX protect S**

Prefabricated self-adhesive pouches in different sizes for an even more convenient creation of the protective packaging – ideally suited for CSSDs with limited space conditions or standardized SBS sizes.

**Important advice:**

Non-sterile. Only pack dry and cool products/sterile goods, risk of condensation.

ORGANIXprotect is not suitable for use as inner protective packaging. Please use only as protective packaging outside the SBS.

ORGANIXprotect is not suitable as a safety bag for disinfected medical devices.
